

1. Build Compound Words

A compound word is two words put together to make a new word. For example, look at these three words:

- hand, pipes, air

To each word, we can add BAG to make three new words, like these: **handbag, bagpipes, airbag.**

Below, each question has three words. What word can be added to make three compound words? The word can be placed in the front or the back.

- | | | | | | |
|----|-----------------------|-------|----|-----------------------|-------|
